

Approximate extent of Maen Hir North

Representative Viewpoint 1 (Left) - A5025 near Buarth-y-Foel between Amlwch and Cemaes within Anglesey National Landscape (AONB)

Existing View

This view is representative of motorists using the A5025 within the Anglesey National Landscape (AONB) approximately 1.4km to the north of Maen Hir North. The foreground view comprises the highway and drystone walling. The midground to the left of the view is partially screened by the wall, while to the right a large pastoral field comprises the midground, with the farm at Buarth-y-Foel visible beyond. The background of the view comprises gently rolling pastoral fields predominantly bordered by robust but short hedgerows. Existing infrastructure including the Porth Wen Solar Farm is prominent in the view, with wind turbines prominent on the skyline to the left and right of the view.

Operation Phase

Maen Hir North will be partially visible to the south in the midground and distant view beyond the Porth Wen Solar Farm in the foreground of the view. To the left of the view, Fields 3 and 4 can be seen just beyond the midground, with Fields 5 and 6 (both mitigation and enhancement areas) beyond. Just to the left, there may be some glimpsed long-distance views of the Former Oil Depot and potentially some fields to south west. To the right of the view, there are some long-distance views of the south eastern section of Maen Hir North on the hill to the right of the property and on a drumlin landform to the left of the property, beyond Porth Wen Solar Farm. During the operation phase, there is likely to be a **Small** scale (adverse) effect reducing to a **Small-Negligible** scale (adverse) effect once the embedded mitigation has established.
