

Representative Viewpoint 5 (Left) - Unclassified lane near St Mary’s Church, Bodewyrd

Existing View

This view is representative of motorists and walkers on the unclassified road just to the north of St Mary’s Church at Bodewyrd. The left of the view is Bodewyrd House (Plas Bodewyrd) and associated farm buildings and vegetation, which partially screens long distance views. Porth Wen Solar Farm can be glimpsed beyond the house. The foreground of the view in the left centre and centre left of the view comprises a large pastoral field which is gently undulating but largely slopes away from the view. Beyond, gently rolling pastoral fields are visible, bordered by a range of cloddiau and stock proof fencing. The Ysgelloog wind turbines sit prominently on the skyline. The midground of the centre left of the view comprises the vegetated and scrubby land of the Former Oil Depot, which screens some long distance views, although Mynydd Eilian and Parys Mountain can be seen in the distance. The centre right of the view is mostly obscured by vegetation, while St Mary’s Church is visible in the foreground. To the centre and right of the view, Mynydd Mechel rises in the middle distance. To the right of the view comprises the lane in the foreground bordered by a cloddiau, beyond which are pastoral fields. In the background, Mynydd y Garn can be seen in the distance to the north west. 400kV pylons and overhead line sits on the skyline to the right centre and right of the view in the middle distance.

Operation Phase

Maen Hir North would be partially visible in the midground view amongst the undulating drumlin landforms. To the left of the view, Field 13 is visible in front of Hafoddlin Fawr and Field 14 is visible ahead of the wind turbine with the Former Oil Depot positioned to the left centre and right centre of the view. Sections of the south eastern tip of Maen Hir North can be glimpsed in the middle distance near Gwredog. To the centre right of the view, Fields 69 and 68 (mitigation and enhancement areas) are visible above the cloddiau, while to the right centre and right of the view, sections of the south west of Maen Hir North can be seen, with Field 62 sitting on the drumlin sides, and Fields 53, 54 and 55 on rising land. During the operation phase, the scale of effect is likely to be **Large** (adverse) reducing to a **Medium** (adverse) once the embedded mitigation has established.
