

Approximate extent of Maen Hir Central

Representative Viewpoint 10 (Left) - Unclassified lane to west of Tyn-rhos and Rhosgoch

Existing View

This view is representative of motorists using the unclassified lane, just west of Tyn-rhos near Rhosgoch approximately 0.6km from Maen Hir Central. The viewpoint is from a semi-elevated position, which offers long distance views to the south of the viewpoint. The foreground to the left and centre of the viewpoint comprises a large pastoral field which slopes into a local undulation to the south of Rhosgoch. Beyond, the view is open, with geometric pastoral fields bordered by hedges and isolated farms. The 400kV pylons and overhead lines cross the view stretching into the distance. In the far distance to the left, Mynydd Llywdiarth and the elevated areas of the peninsula to the north can be seen, while the mountains of Eryri National Park can be seen on a clear day towards the centre of the viewpoint. To the right of the view comprises the unclassified lane and bordering vegetation, with mature hedgerows and a cluster of trees foreshortening views beyond.

Operation Phase

Maen Hir Central would be visible in the midground within the local undulation to the north-west of Llyn Alaw. To the left of the viewpoint, the north eastern section of Maen Hir Central can be seen to the midground with Fields 112, 114 and 115 particularly prominent. Limited views of Maen Hir South A may be barely perceptible in the far distance. To the right, views towards the western side of Maen Hir Central are screened by intervening landform and vegetation. During the operation phase, the scale of effects are likely to be **Medium** (adverse) prior to and once the embedded mitigation has established.
