

Approximate extent of Maen Hir South 'B'

Representative Viewpoint 20 (Left) - Public footpath RHOSYBOL|44/036/1 on junction of unclassified lane and National Cycle Route 5 near Llwydiarth Esgob Farm

### Existing View

This view is representative of walkers and motorists using the unclassified lane between Bachau and Capel Coch near Llwydiarth Esgob Farm to the north of Maen Hir South 'B'. Sustrans National Cycle Route 5 (NCR 5) also follows this stretch of highway. To the left, the view is predominantly foreshortened by hedgerows which border the rural lane although there are views of the pastoral fields beyond. A large geometric pastoral field rises in the midground view to the centre and right of the view, which is bordered by a mature, robust hedgerows along its western edge, with pastoral fields visible on rising land beyond. The rising landform with hedgerow trees on the far side of the field partly foreshortens the views to the right. To the far right of the view, the rural lane stretches from the foreground to the midground with several fields on the rolling topography visible in the background.

### Operation Phase

Maen Hir South 'B' would be partially visible beyond roadside hedgerows to the south of the rural lane and NCR 5. Field 173 comprises much of the view beyond the intervening hedgerow. Field 174 is screened by vegetation to the right of the centre but there may be glimpsed views whilst a section of Field 178 (mitigation and enhancement area) is visible on the rising landform beyond. To the right of the view, Field 172 is partially visible. During the operation phase, the scale of effects are likely to be **Large** (adverse) reducing to **Medium** (adverse) once the embedded mitigation has established.
